POLARIS™ qPCR & Probe Mastermix

Real Time PCR Applications

For cDNA or DNA template amplifications only

POLARISTM
HOTSTART qPCR Mastermix

Catalog #	Product description	Size	Price
R2220	POLARIS qPCR Mastermix (2X), SYBR® Green I, with High and Low Rox, Nuclease Free Water HotStart	5 mL	₹ 11,000
R2221	POLARIS qPCR Mastermix (2X), SYBR® Green I, with High and Low Rox, Nuclease Free Water HotStart	20 mL	₹ 34,000
R2222	POLARIS-AMP qPCR Mastermix (2X), for probe based qPCR Applications, with High & Low ROX, Nuclease Free Water HotStart	5 mL	₹ 12,000
R2223	POLARIS-AMP qPCR Mastermix (2X), for probe based qPCR Applications, with High & Low ROX, Nuclease Free Water HotStart	20 mL	₹ 36,000
R2224	POLARIS-AMP 4X , for qPCR with High and Low Rox and Nuclease free water, 20µL X 1000 Reactions HotStart	5 mL	₹ 25,000
R2225	POLARIS-AMP 4X , for qPCR with High and Low Rox and Nuclease free water, 20µL X 4000 Reactions HotStart	20 mL	₹ 78,000

VEGA™ One Step Mastermix

Reverse transcription and PCR amplification in a single vial.

Contains Incredible PhiScript Reverse Transcriptase

HotStart

Catalog #	Product description	Size	Price
R6321	VEGA™ One Step Mastermix - For Gel Based PCR applications HotStart	2 mL	₹ 15,000
R6322	VEGA™ One Step Mastermix - For Gel Based PCR applications HotStart	10 mL	₹ 60,000
R6323	VEGA™ One Step Mastermix - For Probe Based qPCR - RT PCR Applications, With ROX HotStart	2 mL	₹ 15,000
R6324	VEGA™ One Step Mastermix - For Probe Based qPCR - RT PCR Applications, With ROX HotStart	10 mL	₹ 60,000
R6325	VEGA™ One Step Mastermix - With SYBR GREEN, With ROX HotStart	2 mL	₹ 15,000
R6326	VEGA™ One Step Mastermix - With SYBR GREEN, With ROX HotStart	10 mL	₹ 60,000
R6329	4X VEGA™ One Step Mastermix (4X) - Multiplex qPCR, With High & Low ROX HotStart	2 mL	₹ 30,000
R6330	4X VEGA™ One Step Mastermix (4X) - Multiplex qPCR, With High & Low ROX HotStart	10 mL	₹ 1,20,000

Thermo Labile UNG Products

Uracil - N -Glycosylase : For preventing carry over contamination

Fully inactivated at 10 minute incubation at 50°C

Catalog #	Product description	Size	Price
R3501	DX UNG™ Enzyme , 2U/μL	400 Units	₹ 15,000
R3502	DX UNG™ Enzyme , 2U/μL	2000 Units	₹ 60,000
R3520	Polaris dUTP Mastermix (2X) - Contains UNG, HotStart Taq, dUTP and others, High & Low ROX HotStart	5 mL	₹ 15,000
R3521	Polaris dUTP Mastermix (2X) - Contains UNG, HotStart Taq, dUTP and others, High & Low ROX HotStart	20 mL	₹ 45,000
R6331	VEGA dUTP Mastermix (2X) - Contains UNG, Reverse Transcriptase, HotStart Taq, dUTP and others, High & Low ROX HotStart	2 mL	₹ 20,000
R6332	VEGA dUTP Mastermix (2X) - Contains UNG, Reverse Transcriptase, HotStart Taq, dUTP and others, High & Low ROX HotStart	10 mL	₹ 80,000

HIGH RESOLUTION MELT ASSAYS

For genetic mutations, SNPs and DNA methylation studies

Contains EVAGREEN Dye

High Resolution Melt (HRM) curve analysis is a highly sensitive technique used to detect mutations, polymorphisms, and epigenetic differences in double-stranded DNA. This method relies on the post-amplification denaturation behavior of qPCR products in conjunction with advanced third-generation DNA intercalating dyes, such as SYBR Green II or EvaGreen, which exhibit reduced polymerase inhibition. HRM leverages variations in melting curve profiles and DNA melting temperatures to distinguish between different DNA sequences.

Catalog #	Product description	Size	Price
R2226	POLARIS™ HRM Mastermix (2X) contains EVAGREEN dye , with High & Low ROX HotStart	5 mL	₹ 25,000
R2227	POLARIS™ HRM Mastermix (2X) contains EVAGREEN dye , with High & Low ROX HotStart	20 mL	₹ 75,000

FEATURES AT A GLANCE

SuperShot Solution revolutionizes DNA preparation with its innovative technology, delivering PCR-ready DNA in just 10 minutes.

(Plant Leaf/Mammalian cells & Tissues/
Bacterial/Fungal cells, Finger nails, Hairs etc)

Add samples to 100µl of
SuperShot solution

Incubate at 95°C for
10 minutes

DNA is ready for PCR

- ✗ No Spin Columns
- ✗ No extraction Kits
- ✗ No centrifugation
- ✗ No sample treatment
- ✗ No purification step
- ✗ No PCR Inhibitors

CATALOG

- RC50 - SUPERSHOT Solution, 25ml **Rs. 15,000**
RC50-4 - SUPERSHOT Solution, 100ml **Rs. 45,000**

SUPERSHOT™

DNA in 10 minutes !

Bangalore: 1 Day Delivery

RIGELTM

Where every base counts!

HIGH FIDELITY | LONG AMPLIFICATION | SUPER SPEED

CATALOG

R3720 - Rigel Mastermix(2x), 1 ml
(20µl X 100 Reactions)

Rs. 12,000

IN BRIEF

Rigel Mastermix (2X), contains high fidelity mutant polymerase which is super fast (10s/KB), very high specificity, can also amplify from crude biological samples.

FEATURES

Did You Know?

Rigel Mastermix also supports:

Multiplex PCR
Applications

Direct Colony
PCR Screening

Direct PCR From
crude samples

Amplifications
Upto 30KB

Bangalore: 1 Day Delivery
PAN India: 2-3 Days

WWW.DXBIDT.COM

info@dxbidt.com | +91-7349708807

1 HIGH FIDELITY

Rigel Mastermix offers high fidelity which is greater than 70 times that of Taq DNA Polymerase. Hence best suited for cloning, mutagenesis and NGS based applications.

2 SUPER SPEED

For short fragments ≤ 1 KB, Use 2s/KB
For long fragments ≤ 10 KB, Use 5s/KB
For very long fragments ≥ 10 KB, Use 10 -15s/KB

3 EASY TO USE

Rigel Mastermix contains dNTPs, buffers, and preloaded dye for direct loading on gel. This minimizes the handling errors and improves efficiency.

Fig1: Amplification of a plasmid (13KB) used for site directed mutagenesis using RIGEL Mastermix (2X).

PCR Mastermixes

Catalog #	Product description	Size	Price
R8120	Leo Mastermix, Taq DNA Polymerase Premix with dNTPs and buffer, 2X, With OR Without Gel loading dye.	5 mL	₹ 5,000
R8121	Leo Mastermix, Taq DNA Polymerase Premix with dNTPs and buffer, 2X, With OR Without Gel loading dye.	20 mL	₹ 16,000

gDNA Out cDNA Mastermix

© PhiScript™ Reverse Transcriptase based product

Optimized for ≤ 2 KB Targets

Catalog #	Product description	Size	Price
R6205	PhiScript - 1st Strand cDNA Synthesis Mastermix (5X) <ul style="list-style-type: none">• DNase treatment mix to remove genomic DNA from RNA Samples• An optimised mastermix in 5X concentration containing dNTPs, Random Hexamers, oligo(dT), RNase inhibitors, stabilizers• PhiScript Reverse Transcriptase (200U/μL)• Nuclease Free Water	20μL X 50 Reactions	₹16,000
R6206	PhiScript - 1st Strand cDNA Synthesis Mastermix (5X) <ul style="list-style-type: none">• DNase treatment mix to remove genomic DNA from RNA Samples• An optimised mastermix in 5X concentration containing dNTPs, Random Hexamers, oligo(dT), RNase inhibitors, stabilizers• PhiScript Reverse Transcriptase (200U/μL)• Nuclease Free Water	20μL X 250 Reactions	₹ 62,000

Addressing gDNA contamination in RT-qPCR gene expression is crucial. Such contamination in RNA samples can skew the results of the target transcript amplification. This issue is particularly pronounced for genes with low expression levels, where even minimal gDNA contamination can significantly alter C_q values. The gDNA Out from DX/DT effectively eliminates gDNA from RNA preparations, without harming precious RNA.

SafeStain GREEN

Introducing Safe Stain Nucleic Acid Gel Stain, a revolutionary fluorescent dye poised to revolutionize nucleic acid gel staining, replacing the hazardous ethidium bromide (EtBr). Verified by the Ames test, it's proven non-mutagenic even at concentrations exceeding those used in standard gel staining procedures. This innovative stain offers superior sensitivity compared to EtBr, whether used as a precast or post-gel stain, ensuring accurate and reliable results in nucleic acid analysis.

10,000X

CATALOG# RD 109

Rs. 8000, 500µL

CATALOG# RD 109-5

Rs. 32,000, 2.5mL

Highlights

- Super safe , Non Mutagenic
- Suited for both pre and post electrophoresis
- Can stain dsDNA, ssDNA and RNA
- Compatible with UV, laser and Bluelight imagers
- Good mobility, no migration issues
- Uniform staining of the gel
- Stable at room temperature
- 10,000 X Concentration
- Sensitive & Accurate quantification
- Good signal to noise ratio
- Destaining is not required

PCR and RT Reaction Buffers

Catalog #	Product description	Size	Price
R1110	For Taq DNA Polymerase, 10X Reaction Buffer	5 mL	₹ 5,000
R1210	For High Fidelity Pfu 10X Reaction Buffer	5 mL	₹ 5,000
R2010	PCR Enhancing Solution(5X) GC Targets	5 mL	₹ 10,000
R6110	Reverse Transcription 5X Buffer	5 mL	₹ 5,000

Note: GST will be extra

RNA Builder™ Products

Products related to RNA based work

Catalog #	Product description	Size	Price
RB01	QZol™ (Equivalent to Trizol®)	100 mL	₹ 12,000
RB02	RiboStore™ (RNA Storage solution)	50 mL	₹ 5,000
RB03	RNaseClear™ (Equivalent to RNase Zapp®)	250 mL	₹ 8,000
RB04	RNase Steady™ (Equivalent to RNA Later®) RNA Stabilizing Solution	100 mL	₹ 10,000
RB05	RNA Gel Loading Dye (2X)	5 mL	₹ 6,000

Note: GST will be extra

Nuclease Free Water

Catalog #	Product description	Size	Price
RW01	Nuclease Free Water Free from Endonucleases Free from Exonucleases Free from RNAases Free from chemicals such as DEPC, SDS.	50ml X 2	₹4,500
RW02	Nuclease Free Water Free from Endonucleases Free from Exonucleases Free from RNAases Free from chemicals such as DEPC, SDS.	1L X 1	₹6,000

Note: GST will be extra

Power of Protein Estimation

We are excited to introduce our new range of protein estimation assays, featuring the widely trusted Bradford and BCA methods, both designed for accurate and reliable quantification of proteins in various sample types. These assays come with Bovine Serum Albumin (BSA) standards, ensuring consistent and reproducible results for all your protein quantification needs. The Bradford assay provides a fast, dye-binding method ideal for routine measurements, while the BCA assay offers greater sensitivity and a broader linear range. Whether you are working with purified proteins or complex mixtures, our assays deliver precision, making them essential tools for research labs and industrial applications alike

CATALOG DETAILS

	RC33-1: Bradford Reagent, 100ml	Rs. 2,500
	RC33-2: Bradford Reagent, 1L	Rs. 10,000
	RC38-1 Bradford PLUS (100ml), with BSA Standard Set	Rs. 3,000
	RC38-2 Bradford PLUS (1L), with BSA Standard Set	Rs. 12,000
	RC20 - BCA KIT, 100 ml	Rs. 6,000
	RC20-3, BCA KIT, 1 Litre	Rs. 40,000

Molecular Biology Grade Reagents

Catalog #	Product description	Size	Price
R2801	Lambda DNA, 100ng/μl	50μg	₹ 2,500
R2802	Lambda DNA, 100ng/μl	250μg	₹ 10,000
RC37	Oligo dT18, 50μM	250μl	₹ 10,000
RC37-4	Oligo dT18, 50μM	1 mL	₹ 25,000
RC36	Random Hexamers, 50μM	250μl	₹ 10,000
RC36-4	Random Hexamers, 50μM	1 mL	₹ 25,000
RC36	Random Hexamers, 50μM	250μl	₹ 10,000
RC03	TAE Buffer, MB Grade, 10X	1 L	₹ 6,000
RC03-5	TAE Buffer, MB Grade, 10X	5 L	₹ 20,000
RC16	PBS Buffer, MB Grade, 10X	1 L	₹ 6,000
RC16-5	PBS Buffer, MB Grade, 10X	5 L	₹ 20,000

Oligosynthesis

Molecular Diagnostics

- qPCR & SNP Oligos & Probes
- Double-Quenched Probes
- RAA Probes & RPA Probes
- Electrochemical Probes
- FISH Probes
- COVID-19 Oligos & Probes

Functional Genomics

- Antisense Oligos
- shRNA Synthesis
- siRNA Synthesis
- miRNA Synthesis

Drug Development

- Aptamer
- DEL

NGS

- Adaptor Oligos
- Amplification Primers
- Capture Probes
- Blocking Oligos

CRISPR Genome Editing

- ssDNA
- crRNA
- crRNA+tracrRNA

Protein/Antibody Function

- Trimer Oligos
- Degenerate Primers
- CDRs Variant Library Oligos
- CpG ODN

Molecular Biology

- Custom DNA Oligos
- Custom RNA Oligos
- Modified Oligos
- Oligo Pools

Bangalore

Protein Expression & Purification services

Full suite of protein expression and purification platform including bacterial, yeast, insect and mammalian expression systems. Our powerful gene synthesis platform enhances our scalability, providing you with high purity recombinant proteins ranging from milligrams to grams. As a way to assure we are giving you the best products, we leverage our patented codon optimization technology, to significantly improve the protein expression levels, at no additional charges to you .

Antibody Discovery Services

We offer a broad range antibody production services. our technical platforms cover all stages of antibody discovery by integrating DNA reading, DNA writing and DNA editing, including hybridoma sequencing, immune repertoire sequencing, antibody design and production, antibody affinity maturation and antibody humanization. With the help of our synthesis platforms, we can quickly deliver various recombinant antibodies, such as IgG, Fab, scFV, VHH, BsAb etc, with purity $\geq 95\%$ and endotoxin levels $< 1\text{EU/mg}$, with prices that allow you to discover more while spending less.

Bangalore

Genome editing services

With the aid of our proprietary algorithm, and extensive experience in genome wide sgRNA design, we provide comprehensive services for dozens of model species, and any other non model species, as requested by our customers. sgRNAs designed by the skilled team greatly reduce off-target rates and significantly improve editing efficiency.

Bangalore

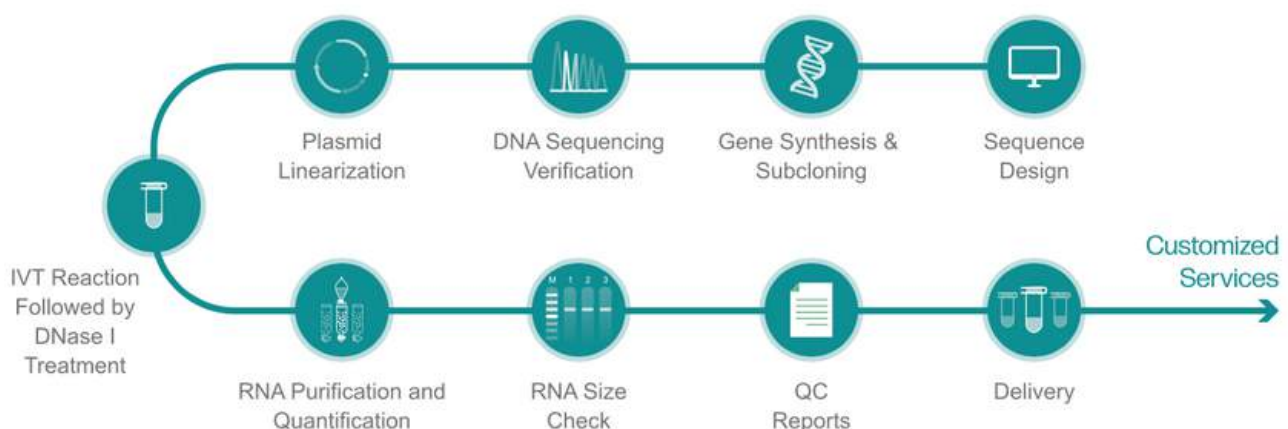

sgRNA Library synthesis

We are committed to provide customers with custom services, including sgRNA designs, library construction, NGS, and bioinformatics analysis. We have produced several sgRNA library products, including human genome knockout libraries, livestock and poultry genome knock-out libraries, and microorganism genomes CRISPRi/a libraries. The capacity, coverage, accuracy, and uniformity quality of our libraries are of the highest in the industry; allowing for optimal high-throughput screening performance.

mRNA synthesis

We provide high quality and cost-effective customized synthesis of mRNA. We also offer sequence optimization and wide range of mRNA modifications, including 5' capping, 3' tailing and nucleoside modification to enhance the stability of mRNA, improve translation efficiency, and reduce immunogenicity. The transcribed RNA molecules can be applied to a variety of research scenarios, such as gene editing, nucleic acid vaccine development, stem cell reprogramming, gene function research, gene diagnosis and structural research.
